Appendix 4.1-F

Preliminary Traffic Signal Warrant Analysis

2003 MUTCD

TRAFFIC SIGNAL WARRANT ANALYSIS (VOLUME BASED)

Intersection: Anawan / Broadway

Major Street Direction: Northbound-Southbound

Year: **Condition:** Future

Operating speed on major roadway: 40 mph

Number of approaches: 3

Required approach volumes

Warrant 1	**EIGHT-HOUR VEHICULAR VOLUME**	Minimum*	Adjusted Minimum**
Warrant 1A	MINIMUM VEHICULAR VOLUME (8 hours of day)		
	Major Street : 1 Lane(s) on each approach	500	500
	Minor Street : 1 Lane(s) on each approach	150	150
Warrant 1B	INTERRUPTION OF CONTINUOUS TRAFFIC (8 hours of day)		
	Major Street : 1 Lane(s) on each approach	750	750
	Minor Street : 1 Lane(s) on each approach	75	75
80 PERCENT SATISFACTION OF WARRANT 1A **AND** WARRANT 1B		Warrant 1A	Warrant 1B
	Major Street : 1 Lane(s) on each approach	400	600
	Minor Street : 1 Lane(s) on each approach	120	60

Warrant 2 **FOUR HOUR VEHICULAR VOLUME**

Major Street : 1 Lane(s) on each approach — If "verify" indicated, see Figure 4C-1 or 4C-2.

Minor Street : 1 Lane(s) on each approach — 25 = accuracy of regression equations

Warrant 3 **PEAK HOUR VOLUME**

Major Street : 1 Lane(s) on each approach — If "verify" indicated, see Figure 4C-3 or 4C-4.

Minor Street : 1 Lane(s) on each approach — 25 = accuracy of regression equations

Hour	Entering Vol. Minor Road+	Entering Vol. on Major Road Northbound	Entering Vol. on Major Road Southbound	Tot. Ent. Vol. On Major Rd	Meets the following volume-based warrants? 1A	1B	80%(1A&1B)	2	3
6:00 - 7:00 AM				0	No	No	No	No	No
7:00 - 8:00 AM	375	265	575	840	Yes	Yes	Yes	Yes	Yes
8:00 - 9:00 AM				0	No	No	No	No	No

2:00 - 3:00 PM				0	No	No	No	No	No
3:00 - 4:00 PM				0	No	No	No	No	No
4:00 - 5:00 PM	275	260	655	915	Yes	Yes	Yes	Yes	Yes
5:00 - 6:00 PM				0	No	No	No	No	No
6:00 - 7:00 PM				0	No	No	No	No	No
					No	**No**	**No**	**No**	**Yes**
				Warrants Met?		**1**		**2**	**3**
						NO		**No**	**Yes**

*From the criteria described for the warrant in the MUTCD.

**If the operating speed is higher than 40mph then the volumes can be adjusted to 70%. (If no adjusted minimum, the minimum from the previous column is shown)

+If more than one approach, report the approach that has the higher volume.

NON-VOLUME-BASED WARRANTS

Warrant 4, Minimum Pedestrian Volume: No

Peak Four Hour Pedestrian Volumes: 0

(non-concurrent) 0

TRAFFIC SIGNAL WARRANT ANALYSIS (VOLUME BASED)

Intersection: Route 140 SB Off Ramps at Mr. Pleasant Street

Major Street Direction: Northbound-Southbound

Year: **Condition:** Future

Operating speed on major roadway: 40 mph

Number of approaches: 3

Warrant 1	**EIGHT-HOUR VEHICULAR VOLUME**		Minimum*	Adjusted Minimum**
Warrant 1A	MINIMUM VEHICULAR VOLUME (8 hours of day)			
	Major Street :	1 Lane(s) on each approach	500	500
	Minor Street :	1 Lane(s) on each approach	150	150
Warrant 1B	INTERRUPTION OF CONTINUOUS TRAFFIC (8 hours of day)			
	Major Street :	1 Lane(s) on each approach	750	750
	Minor Street :	1 Lane(s) on each approach	75	75
80 PERCENT SATISFACTION OF WARRANT 1A **AND** WARRANT 1B			Warrant 1A	Warrant 1B
	Major Street :	1 Lane(s) on each approach	400	600
	Minor Street :	1 Lane(s) on each approach	120	60

Required approach volumes

Warrant 2	**FOUR HOUR VEHICULAR VOLUME**		
	Major Street :	1 Lane(s) on each approach	If "verify" indicated, see Figure 4C-1 or 4C-2.
	Minor Street :	1 Lane(s) on each approach	25 = accuracy of regression equations

Warrant 3	**PEAK HOUR VOLUME**		
	Major Street :	1 Lane(s) on each approach	If "verify" indicated, see Figure 4C-3 or 4C-4.
	Minor Street :	1 Lane(s) on each approach	25 = accuracy of regression equations

Hour	Entering Vol. Minor Road+	Entering Vol. on Major Road Northbound	Entering Vol. on Major Road Southbound	Tot. Ent. Vol. On Major Rd	Meets the following volume-based warrants? 1A	1B	80%(1A&1B)	2	3
6:00 - 7:00 AM				0	No	No	No	No	No
7:00 - 8:00 AM	167	638	281	919	Yes	Yes	Yes	Yes	No

TRAFFIC SIGNAL WARRANT ANALYSIS (VOLUME BASED)

Intersection: Route 138 at Station Driveway

Major Street Direction: Northbound-Southbound

Year: **Condition:** Future

Operating speed on major roadway: 40 mph

Number of approaches: 4

Required approach volumes

Warrant 1	**EIGHT-HOUR VEHICULAR VOLUME**	Minimum*	Adjusted Minimum**
Warrant 1A	MINIMUM VEHICULAR VOLUME (8 hours of day)		
	Major Street : 1 Lane(s) on each approach	500	500
	Minor Street : 1 Lane(s) on each approach	150	150
Warrant 1B	INTERRUPTION OF CONTINUOUS TRAFFIC (8 hours of day)		
	Major Street : 1 Lane(s) on each approach	750	750
	Minor Street : 1 Lane(s) on each approach	75	75
80 PERCENT SATISFACTION OF WARRANT 1A **AND** WARRANT 1B		Warrant 1A	Warrant 1B
	Major Street : 1 Lane(s) on each approach	400	600
	Minor Street : 1 Lane(s) on each approach	120	60

Warrant 2 **FOUR HOUR VEHICULAR VOLUME**

Major Street : 1 Lane(s) on each approach — If "verify" indicated, see Figure 4C-1 or 4C-2.

Minor Street : 1 Lane(s) on each approach — 25 = accuracy of regression equations

Warrant 3 **PEAK HOUR VOLUME**

Major Street : 1 Lane(s) on each approach — If "verify" indicated, see Figure 4C-3 or 4C-4.

Minor Street : 1 Lane(s) on each approach — 25 = accuracy of regression equations

Pedestrian/Bicycle Distribution Analysis

South Coast Rail

Project #: 10111.00

Pedestrian Routes based on TAZs

Station Location	TAZ	Route	Route Description	Alternate Route
Fall River Depot 30621				
	2762	N. Davol St via Brightman Br/Brightman St	All traffic will filter south on Riverside Ave/County St, east through Brightman St bridge, south on North Davol St	
	2772	N. Davol St via Brayton Ave.	Traffic filter north on Brayton Ave, east on GAR Highway and Brightman St/bridge, south on North Davol St	
	2763	N. Davol St via Brayton Point Rd	All traffic will filter north on Brayton Point Rd, east on GAR Highway and Brightman St/bridge, south on North Davol St	
	2771	N. Davol St via N. Main St - SB	All traffic will filter south on N. Main St, west on Pearce St, south on N. Davol St.	Traffic can also filter south on Robeson St, west on President Ave, south on N. Davol St
	2768/ 2774	N. Davol St via N. Main St - SB	All traffic will filter south on N. Main St, west on Pearce St, south on N. Davol St.	All traffic will filter south on N. Main St, west on President Ave, south on N. Davol St.
	2773/ 2775	N. Davol St via Robeson St	All traffic will filter south on Robeson St, west through President Ave, south through N. Main St, west on Pearce St, north on N. Davol St	All traffic will filter south on Robeson St, west through President Ave, south on N. Davol St
	2776/ 2777/ 2782	N. Davol St via N. Main St - NB	All traffic will filter north on N. Main St, west through Turner, north on N. Davol St	
	2778	N.Davol St via Prospect St	Traffic will filter north on Winter and west on Prospect St, north on N. Main St, west on Turner, north on N. Davol St	
	2785	N. Davol St via Bedford St/Central St	All traffic will filter west on Bedford St, north on Main St, west through Turner, north on N. Davol St	
Battleship Cove 30625				
	2783	Battleship Cove via Columbia St	All traffic filters west on Columbia St, north on Eagle St/Water St	
	2784	Battleship Cove via N. Main St	All traffic filters south on N. Main St, west on Pine St and Central St, south on Water St	
	2787	Battleship Cove via Bay St	Traffic filters north on Bay St, east on William St, north on Eagle St/Water St	
	2788/ 2795	Battleship Cove via Broadway St	Traffic filters north on Broadway St, and north on Eagle St	
	2789	Battleship Cove via S. Main St	Traffic filters north on S. Main St and Hunter St, west on Columbia, north on Eagle St/Water St	
	2790	Battleship Cove via Bedford St	Traffic will filter west on Bedford St, south on Water St	
	2791/ 2794	Battleship Cove via Pleasant St	Traffic filters west on Pleasant St/Pocasset St, south on Water St	
	2796/ 2797	Battleship Cove via Plymouth Ave	Traffic will filter north on Plymouth Ave, west on Middle St, north on Brodway St and Eagle St/Water St	

Barrowsville 30580				
	2455	S. Worcester St. via Maple St	All traffic will filter north or south on Maple St, east through Harvey, northwest on S. Worcester St/Dean St	All traffic will filter north on Dean St OR north on Maple St, west on S. Worcester St
	2453	S. Worcester St. via N. Worcester St	All traffic will filter south on N. Worcester St, west on S. Wocester St.	
	2451	S. Worcester St. via Barrows St.	All traffic will filter south through Taunton Ave, west on Barrows St, southeast on S. Worcester St/Dean St.	All traffic will filter west on W Main St, south through Austin St, southwest on Barrows St
	2450	S. Worcester St via Dean St	All traffic will filter west on E Hodges St, north on Dean St.	All traffic will filter west on S. Worcester St, north on Dean St.
Freetown 30606				
	2806	S. Main St via Narrows Rd	All traffic will filter southeast on Narrows Rd/Causeway Rd, south on S. Main St AND north on S. Main St	
Kings Highway 30633				
	2831	Kings Highway via Church St - SB	All traffic will filter south on Church St, west on Tarkiln Hill Rd/ Kings Highway	
	2833	Kings Highway via Phillips St	All traffic will filter, east on Samuel Barnett Blvd, south on Phillips St/Church St, west on Tarkiln Hill Rd/ Kings Highway	
	2832	Kings Highway via Ashley Blvd	All traffic will filter south on Ashley Blvd, west on Tarkiln Hill Rd/ Kings Highway	
	2834	Kings Highway via Mt Pleasant St	All traffic will filter south on Mt Pleasant St, east on Kings Highway	
	2835	Kings Highway via Church St - NB	All traffic will filter north on Church St, west on Tarkiln Hill Rd/ Kings Highway	
	2836	Kings Highway via Tarkiln Hill Rd (East)	All traffic will filter west on Tarkiln Hill Rd until Kings Highway	
Whales Tooth 30640				
	2868	Mc Arthur Dr via Purchase St	All traffic will filter north on Purchase St, east through Union St, north on Mc Arthur Dr/Acushnet Ave	
	2867	Mc Arthur Dr via S. Front St	All Traffic will filter north on S. Front Street. Some traffic will filter east on Delano St and take the ped. Bridge to S. Front St	
	2864/ 2862	Mc Arthur Dr via Union St	All traffic will filter east on Union St, north on Mc Arthur Dr

Appendix 4.1-H

Ridership and Trip Generation (2030)

Note: The first seven pages of this appendix remain unchanged from the DEIS/DEIR. The station boarding estimates presented in this appendix have been supersceded by the station-level boarding information provided in the 2035 CTPS ridership projections (FEIS/FEIR Appendix 3.2-H). However, this appendix is retained in the FEIS/FEIR because these 2030 ridership and boardings were the basis for many of the station-level transportation impact assessments presented in Chapter 4.1 of the FEIS/FEIR. Section 4.1.5.2 of the FEIS/FEIR (subsection on stations) discusses the sensitivity analyses conducted to compare the 2030 and 2035 boardings and determine necessary updates to the impact analyses. The last page of this appendix provides the backup documentation of this sensitivity analysis.

[1] Total Includes: AM Peak Period = Peak 3 hrs (6AM to 9AM); Midday Peak Period= 6hrs (9AM to 3 PM); PM Peak Period = Peak 3 hrs (3PM to 6PM) and Nighttime Peak Period = 12hrs (6PM to 6AM)

[2] AM Peak Period = Morning Peak 3 hrs (6AM to 9AM)

[3] Trips from DEIR documents and reflect the highest projected ridership at individual stations from the Stoughton Electric, Attleboro Electric and the Whittenton Electric Alternative analyses

[4] Peak Hour adjustment factor of 0.67 used to reduce CTPS peak period (3-hours) ridership to peak hour ridership

[5] Walk/Bike = Assumes a max of a 1 mile

[6] PNR = People using parking lot spaces; Park and ride ridership converted to vehicles with vehicle occupancy factor of 1.05 .

[7] KNR = Kiss-and-Ride or drop-offs

[8] Other = Transit access

Appendix 4.1-I

Intersection Summary

Area Type: Other
Cycle Length: 75
Actuated Cycle Length: 75
Offset: 0 (0%), Referenced to phase 2: and 6:, Start of Green
Natural Cycle: 80
Control Type: Pretimed
~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.
